

Simply Connected, Simply Secure.

Security and lifestyle merges with C24 Interactive –
for total and complete control at your customer's fingertips.

C24
interactive

Customer by customer, C24 Interactive helps you grow your business

Whether your customer is looking for a cost-effective and simple, easy to use cellular solution or is after a top-of-the-line comprehensive lifestyle-changing experience – the C24 Interactive platform takes the guess-work out of what goes on in your customer’s home.

Boasting industry-leading features such as unlimited video storage and no limit on the number of zones monitored for lifestyle triggers and alerts, the C24 Interactive solutions are designed around latest technologies, revolutionizing the customers experience with a security solution equipped to remotely control their security system and view live video but also control home automation devices such as thermostats, door locks and lighting for a true lifestyle change.

Whether home or away, your customer can administer their security and lifestyle needs through a variety of secure, password-protected methods. The C24 Portal on computers, the C24 Manager Mobile App for Apple and Android devices and the C24 Mobile Portal for Blackberry and other smartphone devices all share intuitive and user-friendly interfaces.

Life, safety and lifestyle come together through C24 interactive

C24 Interactive Products Make On-line Home Management Easy

Easy to install. Easy to configure. Easy to Use.

Wireless connectivity with WiFi and Z-Wave® technologies make installation easy. When using the C24-HUB gateway, the cameras and Z-Wave® devices are easily enrolled and auto-configured. Through the web portal, scheduling and interoperability is made easy with step-by-step programming wizards.

The C24 Interactive HUB Broadband Solution: The ultimate lifestyle-changing customer experience

The solution that makes all the difference is the C24 Interactive Broadband HUB.

The C24 Interactive HUB is a broadband gateway that gives your customer the ability to control and monitor devices through Z-Wave® technology. With seamless integration to their IMPASSA or PowerSeries security system, customers can control doors, lights, thermostats and other appliances wirelessly, with total and complete control at their fingertips. The gateway also provides a private and secure WiFi network that is used for secure communications to the C24 Interactive cameras.

Features of the combination of either IMPASSA or PowerSeries products with the C24 Interactive HUB broadband solution include all of the capabilities of the C24 Interactive Direct Cellular Solution, but additionally offers:

- Live video viewing with UNLIMITED video storage for recordings
- Support of up to 10 cameras
- Remote control for up to 32 3rd party home automation devices including lighting, door locks and thermostats through Z-Wave® Wireless Modules

The C24 Interactive Broadband HUB Solution brings out the best of both worlds: SECURITY for any household or small business combined with LIFESTYLE-ENHANCING home automation capabilities.

The C24 Interactive
Broadband HUB

Ultimate Control

C24-HUB is a gateway that gives the customer the ability to control and monitor devices through Z-Wave® technology. Customers will be able to control doors, lights, thermostats and other appliances wirelessly. The gateway also provides a private WiFi network that is used for secure communications to the C24 Interactive cameras. It also provides seamless integration with your DSC security system for arm/disarm, bypass and real time system and zone status.

Ultimate Video

C24-CAM54IR IP 54 Rated Camera with IR illumination allows for indoor and outdoor use in both lit and low light situations. The camera automatically provides extra IR illumination when enough visible light is not available for proper operation. Connectivity is provided through either a hardwired or wireless IP connection to the C24-HUB.

C24-CAMANL Analog Camera Adapter integrates new or existing analog cameras to the platform. The adapter will convert and transmit the video signal over a hardwired connection to the C24-HUB.

Ultimate Automation

Z-Wave® Wireless Modules allow homeowners to have 'connect and control' of their home remotely through C24 Manager and/ or mobile devices. For example, lights can be set to turn on and off in random patterns to give the impression of occupancy, thermostats can be controlled to save energy or even turned on remotely to warm a location prior to arrival. Our offering includes Z-Wave® compatible in-wall light switches, plug-in lamp/appliance modules, door locks and Z-Wave® wireless thermostats. Enrolling these devices is easy – and provides the opportunity for future Z-Wave® add-ons that the customer can easily do themselves by way of upgrades via the C24 Portal. Your customers will love it because their investment is easily upgradeable and convenient. You will love it because it saves you valuable time and cost, while at the same time benefitting your RMR and adding to your bottom line.

IMPASSA (1.1+) and PowerSeries v4.6, the newest, next-generation security systems from DSC bring out the best of C24 Interactive Solutions.

The C24 Interactive Direct Cellular Solution: a simple, yet effective security solution for the cost-conscious home or small business owner.

Impassa with HSPA (3G) 3G2055

IMPASSA, a 2-way wireless security system comes with an integrated HSPA (3G) cellular communicator which, in conjunction with the C24 Interactive Direct Cellular Solution, offers your customer a cost-effective, simple answer to their security needs.

Similarly, the C24 Interactive Direct Cellular solution is compatible with the DSC PowerSeries line of control panels, enabling customers to stay connected to their home, family, and small businesses via the web, mobile phone, iPhone/iPad/iPod and Android phones and tablets.

Features of the combination of either IMPASSA or PowerSeries products with the C24 Interactive Direct Cellular Solution include:

- Remotely arming and disarming, bypassing and viewing real time system and zone status on any computer, Apple or Android and mobile/Smartphone devices.
- Unlimited email and sms notifications on an unrestricted number of monitored zones (not including PIR devices)

PowerSeries HSPA (3G) 3G2060R Communicator

IMPASSA or PowerSeries + C24 Interactive = Greater Peace-Of-Mind for you and your customer

Simply Connected, Simply Secure.

Compatible with IMPASSA (1.1+) & PowerSeries (4.5+)
